FOREWORD

From the time the pioneers came to the Northwest Territory before 1800 until 1867 there were no official death records. In Franklin County which was organized in 1803 some deaths were reported from 1867 to 1908. To aid researchers, since the early county death records are incomplete and many old cemeteries are now abandoned, moved, poorly maintained, or non-existent, members of The Franklin County Genealogical Society have been searching for and recording all legible readings in cemeteries established before 1920. The stones were copied in order of location keeping the apparent relationships between families on the same lot. An effort has been made to reconcile these readings with readings done in earlier years.

To aid researchers who are seeking information on deaths on record since 1908, send for more recent death records to:

The Ohio State Bureau of Vital Statistics
65 South Front Street
Columbus OH 43215

The Bureau of Vital Statistics will make a ten-year search of its records for a reasonable fee.

As an indication of how the population of Franklin County has grown from 1820 to 1980, note the figures below.
